AND PRECISION STAMPING

Evolutional & Intelligent Mechanical Fine-Blanking Press

Fine-blanking is the cost-efficiency metal forming process. FPB series, the triple action press, is outstanding for precision and complex metal stamping parts which flatness is retained, straight, superior finished edges. Siemens control system transfers the production information to PC at manager office. The information is compatible with ERP system to reduce manual input job.

- ◆ Capacity : 160 / 250 ton
- ◆ Stroke length : 50 - 80 mm
- ◆ Speed : max. 150 spm
- ◆ Material Width : max. 250 mm
- ◆ Material Thickness : max. 12 mm
