Ultra Precision Press SVL-10

INGYU's latest SVL series high speed press has a vertical accuracy of up to 0.001 mm. It is tailor-made for plastic and metal materials as thin as 0.05 mm. SVL high speed press not only adopts servo drive system, but also a oil-free design, which makes it suitable for clean room production. Our Siemens control systems are able to synchronize with the MES database to collect the production data, also support remote diagnostics, providing you an efficient production line.
